### PROFILE

I'm a software engineering student at the University of Central Punjab, enjoying my journey of problem-solving and web development. I've explored front-end technologies like HTML, CSS, and Bootstrap and back-end in PHP, and I have basic skills in both C++ and Python. While I'm still new to the job scene, I'm eager to apply my knowledge and learn more on the job. Currently looking for opportunities to start my career journey! If you have any specific questions or need further assistance, feel free to let me know!

### WORK EXPERIENCE

#### Fresher

- Acted as a team leader in group projects, delegating tasks and providing feedback.
- Made a Front-end Netflix Clone.
- Basic login and Signup pages using PHP.
- Identified issues, analyzed information and provided solutions to problems.
- Gained strong leadership skills by managing projects from start to finish.

#### Job Description

Fresher

- As a student for degree in Software Engineering from the University of Central Punjab, I am seeking an entry-level position as a Software Engineer. Eager to apply my foundational knowledge in front-end web development, including HTML, CSS, and Bootstrap and back-end in PHP, along with basic proficiency in C++ and Python. I am enthusiastic about contributing to real-world projects, learning from experienced professionals, and furthering my skills in a dynamic and collaborative work environment. Open to opportunities that will allow me to grow and make a meaningful impact in the field of software development.
